EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Neil Gershon on May 26, 2005.

The application has been amended as follows:

In the first paragraph of the Specification, after "This application" add --is a divisional of U.S. patent application Ser. No. 10/163,142 filed June 5, 2002, which--;

After "Sep. 12, 2000" add --now abandoned,--;

Claim 4, line 2, "depressing" has been changed to --exerting a force on--;

Claim 5, line 2, "depressing" has been changed to --exerting a force on--.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, U.S. Patent No. 4,710,180 to Johnson fails to disclose or suggest that the device is placed within the vessel lumen. There are many syringes having needles that are used to penetrate a vessel lumen. However, the prior art fails to disclose or suggest all of the limitations of claim 1 including, "exerting a force on the plunger as the elongated member is inserted through the tissue towards the vessel wall" in conjunction with determining entry of the

instrument into the vessel by detecting movement of the plunger to eject fluid. The prior art fails to disclose or suggest all of the limitations of claim 6 including, "depressing syringe plunger to eject the fluid through the opening in the sheath as it is inserted through the tissue towards the vessel wall."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Jacob Davis whose telephone number is (571) 272-4693. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T. Nguyen can be reached on (571) 272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
